## THE WORLD OVER

NEW SPEED BOAT AFTER TROPHY  
FIRST TRADER ARRIVES IN BAY  
NEW PRESIDENT OF CUBA STATE

Hubert Scott, Pains will challenge Gay Wood for the Harmsworth trophy in behalf of Great Britain with a packet motorboat of revolutionary design, Miss Britain III, it became known last week as Scott-Paine, designer and builder, revealed her specifications. He has left for the United States and the races at Detroit August 18, with the little craft that weighs only 2,800 lbs. as compared with the seven ton of Gay Wood's defender, Miss America X. The first race is set for September 2.

CHURCHILL, Aug. 13.—First mercantile motorboat under the flag of the northern Manitoba harbor this season, S.S. Pennyworth, steamed slowly into port. Elevator and steam whistles shrieked the traditional "welcome" welcome as the British tramp steamer, having in the last lap of ocean proportions on the last leg of her voyage from the United Kingdom, the Pennyworth, one of a fleet of 10 boats to trade into this port this year, now alongside the huge modern elevator, a full month ahead of the 1931 schedule set by S.S. Parnworth.

The Pennyworth carried an assorted cargo of merchandise destined for prairie ports.

MANANA—Dr. Carlos Manuel de Cespedes, son of the first revolutionist President of this Republic was inaugurated provisional head of Cuba on Saturday, replacing the deposed Gerardo Machado.

A short time after he took the oath in an informal ceremony at his home, several unidentified men sped "west" in an automobile and fired a number of shots into the residence. No one was hurt.

## BIG MARKET FOR ALBERTA BARLEY IN UNITED STATES

CALGARY—The localization of the sale of beer in the United States is proving of great advantage to producers of barley and to malting companies in Western Canada, according to L.R. Hess, general manager of Canada Malting Co., Calgary, who had just returned from a visit to western United States.

The plant in Calgary is running 24 hours a day, said Mr. Hess, and extra help had been taken on to supply malt to the breweries in the States equaling in barley between 50,000 and 75,000 bushels a month. The plant has a capacity of approximately 1,500,000 bushels of barley a year. The home market consists of the three prairie

## MANY ATTEND THE STAMPEDE HELD WEDNESDAY

The Carbon Stampede held last Wednesday was one of the best in this sport ever held in Carbon and riders were present from all parts of the southern country. The events went off with regularity equal to that of the Calgary event, and many good performers demonstrated their ability in the calf roping, steer riding and horse riding.

The Stampede got under way about 10:30 in the morning with the parade, and a large number took part in this event. The parade was good for a small town and quite interesting to watch. Prizes in the parade were given as follows:

Best dressed cow girl, G. Maxwell. Best mounted rider, outfit, Molly Lang. Best dressed cow boy, Bobby Marshman.

The Delscher band was in attendance and led the parade. Later they played selections and at 1 p.m. the crowd went to the grounds for the stampede events. It is estimated that over 700 people were at the grounds in the afternoon, many coming for miles to take in the event.

The following were the prize winners in the various events:

Saddle Riding—Geo. Macintosh of Calgary, first; G. Galavaneau, Wayne second.

Barrel Race—J. Rendle, first; Don Thompson and Jordan Thompson of Wayne split second.

Calf Roping—G. Galavaneau, first (time 23 seconds); Fred Galavaneau second, time 40 seconds; E. Hodgson third, time 50 seconds.

Men's Steer Riding—Don Thompson first; Jordan Thompson, second.

Shooting Pony Race—W. Abramson first and Wm. Abramson, second.

Saddle Horse Race—Bobby Marshman, first; John Schmidt, second.

Road Race—Paula Lefebvre first, Bobby Marshman, second.

In the evening a monster dance was held in the Farmers Exchange hall. Probably the largest crowd ever to gather in this hall, was present and a gay time was had. Eddie McLean's orchestra furnished the music for the occasion.

Provinces consumes approximately one half that quantity, he said. Of the 22 million bushels of barley produced in Alberta last year, only about 2 million bushels were suitable for malting purposes. The reason being that farmers sowed their barley late with the result that a great quantity of the crop was caught up frost, which spoils it for malting purposes.

## ANNIVERSARY EVENT WELL RECEIVED

Carbon received considerable publicity through the anniversary number of its local newspaper on August 2nd, when local newspapers throughout the province carried articles about the edition.

The editor personally received letters of appreciation from R. J. Pultar, manager of the Stock Yards branch of the Bank of Montreal in Calgary, and from W. G. Winters, of Winter Bros. Funeral Home, Drumheller. Many friends also had words of appreciation for the edition.

We appreciate the fact that others thought the edition worth some mention, especially from outsiders, and trust that future years may see as much local advertising support such week as is accorded this newspaper by its Dominion wide customers.

Below are a few of the articles copied from various newspapers. Space forbids publishing them all.

The Carbon Chronicle commemorated the 21st anniversary of Carbon last week with a 12-page edition, all home print paper, which gave a comprehensive write-up and history of early days, first business firms, and many other matters of much interest. The edition also carried advertisements of practically every firm in town. Carbon is a live town of some 600 inhabitants and its newspaper is at all times a credit to the town, but in this instance it has exceeded all previous efforts and does the editor and the town justice.

—Consent Enterprise.

In commemoration of the twenty-first anniversary of the incorporation of the Village of Carbon, Edward J. Rouleau, editor of the Carbon Chronicle, issued a twelve-page edition on August 3, 1933. This issue is packed full of interesting items about the early days of Carbon and other incidents leading up to the present day. An illustration on the front page of the first section shows a rural settlement where the Village of Carbon now lies, taken in 1906, while in illustration on the back page of the second section shows the present-day Carbon. The Chronicle editor is to be complimented on his splendid effort.

—Drumheller Mail.

We are in receipt of a special 12-page home print edition of The Carbon Chronicle, published by E.J. Rouleau at Carbon, Alta. In honor of the 21st anniversary of the village of Carbon, this important Alberta town. The edition is well patronized by the merchants and business firms of Carbon, and the issue contains many stories of the early days in the Carbon district and the progress that has been made in the development of the town.

Carbon district last year harvested the largest grain crop in its history; many farmers threshing over 60 bushels of grain per acre. Several coal mines in the town, or adjacent, are actively operating, and their product going to all parts of the west, even as far as Alaska.

The edition is well illustrated, well edited and well printed, and is a credit to the young publisher, who handled all details of the work single-handed.—Kispio Koutenian.

## HOUSEHOLD HINTS

Potatoes soaked in cold water for two hours before boiling will be white when cooked.

A little lemon juice added to the water in which rice is boiling will whiten it wonderfully.

The ugly ring which gasoline often leaves when used to clean delicate materials, can be avoided by adding a little salt when cleaning.

Alum melted in an old iron spoon over a hot fire forms an excellent strong cement for mending glass or china, which when dry can be washed in hot water.

Soup strained through a cloth will have all fat removed.

When potatoes are nearly cooked add salt to insure fluffiness and to prevent them going to pieces.

A dry cork will remove stains from silver and never scratch it. If the cork is cut to a point it can be worked in the crevices which have become tarnished.

A lemon heated before squeezing will give twice the amount of juice.

## CARBON GIRL IS INJURED WHEN STRUCK BY CAR

Near tragedy marred Stampede day in Carbon for some when Jerry Jurkyk, five and a half year old daughter of Mr. and Mrs. J. Jurkyk of Carbon, was run over by an automobile, and badly hurt.

The accident happened on front street opposite the Drug Store, about 1 p.m. The child was with its mother viewing the sights on the day of the Stampede and attempted to cross the street to its father, who operated the shoe store above, next to the Drug Store, when the big Hudson car owned by P. Paces struck the child. The mother claimed that the child was knocked down by the bumper, but that the wheels did not pass over its body. The child however, received internal injuries, and in the accident following the mishap the child got up and ran to the sidewalk, where it fell unconscious. Medical aid was immediately summoned and the child taken home, where Dr. McPherson is looking after it. The child is said to be injured internally, but reports are meagre, although it is said that the girl is on the road to recovery.

## Mackenzie King Speaks in Calgary

(The Calgary Albertan)

Dr. Hcn. W.L. Mackenzie King, Liberal chief, speaking in the Palliser Hotel on Saturday to an audience filling the hall room and overflowing to the adjoining foyer, unveiled his philosophies, replied urbanely to demands for an outline of policies and, with charming grace, paid tribute to the efforts of those whose sincerity and fortitude he admired but whose policies he found imperative by conviction to oppose.

"Had I been out of work for two or three years and faced hourly with the problem of finding food, clothing and shelter without the hope of earning then I would likely try to 'take things in my own hands' he said, at one point in his address.

"Were I a farmer and some corporation could get all the credit it required and I couldn't get any I would begin to talk to the farmers' party, but, but I would realize that my help lay not in class legislation but in the cooperation of men and women who have the soul and heart and will to co-operate. Unless we build such cooperation and learn that we are one another's keeper our state will be undermined," he said.

Sharing was needed. Why should capital have all the control of production and men and women were getting their lives and work into them? Men who worked on railways were more than wage earners. Men who put their money into the railways were also rendering a public service and should get a fair return.

"Let us see, however," Mr. King added, "that the workers also get a fair return. Let us understand that men and women who are working in the farms are giving social service. Where gain interferes with such service, let us stop the interference."

Burnt marks on plate and silver will vanish like magic if treated with cork dissolved in wet salt.

Did the chimney of your hot burning stove pile stones in stove or furnace? This simple method will be found useful in places in which soft coal is burned.

If poultrymen are troublesome when picking chicken or birds take a cloth and some sittings of corn meal and rub the birds well with this. The pests will come off easily.

When peeling fruit or vegetables put a slit in a small cork and fit it in the back of your paring knife. This will save your fingers.

To remove spots in rugs, rub corn starch into nap and let remain for a couple of days. When brushed the spots or mud spots will disappear.

## HOADLEY OPPOSED TO IMMIGRATION SCHEME

EDMONTON—"Undoubtedly the Dominion government will consider doing work for those at present in this country before letting others in," declared Hon. George Hoadley, minister of agriculture and health, when asked regarding reports from Quebec that the immigration doors might be again thrown open.

"This policy will have to be decided by the Dominion," he said. "And before such a decision was reached the provinces would be consulted. There is no doubt the provinces would give a prompt reply."

From other sources it was learned that there are about 380,000 men out of employment in this country at the present time, which would indicate that revival of immigration would find little support with governments.

## Bank Montreal Crop Report

General.—In the prairie provinces, further damage has been done to the grain crops over large areas particularly in the southern and central Saskatchewan and southern Alberta by drought, heat, grasshoppers and frost. Harvesting is under way in Saskatchewan and Manitoba except in the most northerly districts but in Alberta it will not be general for ten days. Hays have benefited positively and the feed crops in a number of districts.

In Quebec good growing weather has prevailed and crops are making satisfactory progress. In Ontario fairly heavy precipitation has materially improved the condition of crops in most districts. In the Maritime Provinces the weather has been favorable to growing crops, but rain is still needed in many sections. In British Columbia weather conditions continue favorable.

Northeastern Alberta—An average yield is expected on summer wheat. Strubble crops and coarse grains are damaged by drought and frost and low yields are inevitable. Pasture is poor.

Western Area. In the north good yields are indicated; in the south all grains and hay crops are poor. Pastures are badly killed. The total annual snow belt crop is a good average.

Saskatchewan.—In the northern area the weather is extremely warm and crops are maturing rapidly. A slight frost damage was reported July 31st. Indications point to fair yield except in the district west of Saskatoon where grain crops are almost a failure and the feed situation serious. In the southern area scattered showers have been too late to be of benefit. Hail and a

## CARBON'S FIRST PROVINCE-WIDE CHAMPIONSHIP

Robert Wise Wins Boys' Tennis Championship of Alberta

ONLY 13 YEARS OLD

Carbon has at last produced an Alberta Champion in the line of sport. Robert Wise of this town, competed in the Alberta Lawn Tennis Championships held in Calgary last week and was successful in winning the Boys' Championship of the Province, defeating Tim Stark of Calgary in the final.

In commenting on this win, the Sporting Editor of the Calgary Albertan writes:

"Robert Wise, a youngster from Carbon, brought that great little tennis town's first provincial trophy in its history, when he defeated Tim Stark of Calgary in the final of the Boys' Singles. Hardly able to see over the net, the pride of Carbon tennis enthusiasts gave a wonderful display of courage and fortitude back to win after losing the first set and trailing in the second set."

The final scores were 3-6, 6-4, 6-3 in favor of the Carbon boy. The result is very gratifying to the management of the Carbon Tennis Club, who are sponsors in the district, as this is the first time that an Alberta Championship has been won in any line of sport by an individual representative from Carbon. We congratulate Robert Wise on his successes.

Robert is a native son of Carbon and is only 13 years of age. The age limit of Carl's Championship is 16 years, so our local champion has another two years in which to improve and defend his title.

Jas. Fairbairn Wins Alberta Junior Secondary Singles

We have to report the success of another Carbon Tennis player, James Fairbairn, who learned his tennis on the Carbon courts, and was successful in winning the Junior Secondary Singles of the Alberta Tennis Association championship meeting held in Calgary. The championship events are open to those who have been beaten in the first three rounds of the championships, and in

(concluded on back page)

termed did extensive damage in the Kibby-Areola districts. Pasture is in the worst and winter feed will be inadequate.

## Real Light On Russia.

So many conflicting reports as to conditions in Soviet Russia have been given to the public in recent years, and it has been so difficult to distinguish in such reports what is pure propaganda either for or against the political and economic systems now prevailing in that vast country, that people have developed the habit of shrugging their shoulders when Russia is mentioned and refusing to place reliance in much that is told them. It was, therefore, with unusual interest that delegates to the World's Grain Conference at Regina listened to the first-hand knowledge which was brought to them by E. J. Strimman, consulting engineer of Brooklyn, Iowa, who was employed by the Soviet Government for several years in connection with its gigantic plans for the mechanization of agriculture as part of its famous five-year plan.

Mr. Strimman had no political axe to grind, he had no propaganda to spread. He merely told an unvarnished story to the assembled world grain experts of the situation as he personally knew it to exist in Russia. And inasmuch as agricultural development in Russia cannot but have a direct effect on agriculture in Western Canada, it is of interest and value to have Mr. Strimman's first-hand information.

Quoting Litvinov, Soviet Commissioner of Foreign Relations, as stating at Geneva last June that "unemployment, wage cuts, and strikes were unknown in the land of the Soviet," Mr. Strimman commented that they were impossible in a country "where bread cars are granted only to the obedient worker." Control of the country's food supply precluded strikes, he said. There is no unemployment because the country's census takes no account of any but the workers—the unfortunate do not officially exist. There is no necessity for wage cuts for the money the government pays its workers has no value outside Russia. Money will not be honored for more than one nickel on a purchase abroad, or on a purchase of imported goods within Russia. Mr. Strimman explained.

Nevertheless there is wage-cutting in a sense. Mr. Strimman giving the following example: The Soviet government pays its workers less each year, requiring each worker to turn back a part of his wages for bonds. In a fair job it amounts to a month's wages, which he could use for food. The worker feels this keenly but he does not complain.

Russian workers, he continued, by report are always poverty stricken, as a whole today have the worst living conditions of any of the workers of their neighboring countries in Europe. The Russian could meet conditions in his plodding peasant life, but uprooted and the reserve supplies taken from him, he has no way to cope with winter's cold and the fearful winter hunger. The food supply available to Russian workers has fallen off in quantity steadily since 1928. Clothing, bedding and shoe supply are reduced to almost nothing. Housing has become more and more congested in the industrial and agricultural centres provided by the Soviet.

Describing the system of farming, Mr. Strimman said farmers lived in villages going out to farm their own individual strips of land. Throwing the land into collective farms was only to obliterate the dividing lines by farming them in one unit. These collective farms were established before the State farms. The State farms were designed as models in each section for collective and communal. Exorbitant taxes, no right to purchase, the possibility of fine as an enemy of the state, and the promise of machinery through the government on their collective output brought 90 per cent. of the farmers into collectives in the great drives of 1930 and 1931.

A Soviet State farm is never an independent farm in the western world sense. It remains only the link in a vast network of farms, with Moscow as the centre from which comes all orders and supplies. The State farms directing these collectives are not even an agricultural nor even an engineer. The entire crop is wheat.

State farms are under the direction of a resident farm superintendent. He has several assistants, all with offices and residences in the main settlements. There are directors of the machine, the experimental station, and of grain production. Each of these have further assistants, the number ever growing without end. All were specialists and did no manual labor. The administrative class grew larger and the working class relatively smaller. More and more offices are required and more desks to put in them. The working class grain recruits from only the more remote districts and in the seasons of intensive work the women are brought in as "punch hitters." Now, in 1933, it has become necessary to drive the office class back to the farms.

Describing how everything is centralized in Moscow, how even a practical director of a State farm had to wait for orders to begin an operation on his farm that he knew was long overdue, but which although controlling perhaps thousands of workers, he had no right to start without definite orders from Moscow, Mr. Strimman said:

"One question looms large in looking over the situation in this modern dictatorship. How did the government get control over a vast country and over the destinies of the entire people? The answer is simple: The get control of the food supply. Why should any people's government need to hold its people by such a strong leash? Because the government is of the minority party, representing five to seven per cent. of the entire population. Then one wonders why do not more Russians join the Communist party and share the privileges which attend the 'party membership' in Russia today? The answer is that it is made very difficult for a Russian to join the Party, and of late only the officials and the army are allowed to join."

Everything, down to the smallest detail, is dictated from Moscow, and control maintained through a collection of fines, taxes and shares of crop. There is never any lessening of centralization by any such means in official circles. It is always ready to step in as an increasing of power in some particular field. This brings us to a very important consideration in a government dominated by five to seven per cent. of the population and it is this. The Party must be kept in all the major agricultural posts, regardless of ability among "comrades," because in these officials lies the power to control food, production, farming methods, all expenditure, education of the worker and his family. Thus it is the concern of the government in appointing men to these chief posts that they are "safe" and "good party men." That is the reason why Communists insist that "politics and farm engineering cannot be separated."

## Weakening Diarrhoea Dangerous Dysentery

Diarrhoea and Dysentery do not need to run for any length of time until the whole system is weakened and debilitated. Few other diseases so quickly undermine the strength and bring about a condition of prostration and exhaustion. Dr. Fowler's Extract of Wild Strawberry is not only a powerful remedy for these ailments, but it also builds up the system, but at the same time it strengthens, stimulates and braces up the system. Never be without a bottle of Dr. Fowler's. Always be prepared in case of emergency. Manufactured only by Dr. T. J. Milburn Co., Limited, Toronto, Ont.

## Grain Deterioration

Saskatchewan Research Workers Develop Method For Treating Damp Wheat

The practical value of the World's Grain Exhibition and Conference is revealed again in addresses contributed to discussion at the conference side of this month's gathering by Dr. R. K. Larmour, J. S. Clayton, and C. L. Wrenshall, of the laboratories of the University of Saskatchewan. These men have been experimenting with wet wheat, with a view to eliminating the development of heat and consequent deterioration of the grain before it reaches the driers at the head of the lakes.

Unsure rain seasons have not been a common thing in the agricultural life of prairie Canada of recent years, and yet on occasions we do get protracted rainy spells that carry their threat to cut grain. The three Saskatchewan scientists mentioned have developed a vapor called toluene, that is held to be not inflammable in the slightest and that carries no danger to the quality of grain, but that yet effectively prevents damage from heat, mustiness and fungi in the grain consequent upon wet weather.

This would seem to represent a distinct advance in agricultural science, and that Saskatchewan men have been able to reproduce this treatment and impart it to the World's Grain Conference will be a matter of satisfaction to all citizens of this province. —Regina Leader-Post.

## Maxims Of His Majesty

Rules For Life Conduct In Workroom

At Buckingham Palace

An English journal in its current issue gives favorite quotations of celebrated people and shows quite clearly how many men and women whose names and deeds are known through the world fortify their lives by recalling the sayings of kings and queens. This list of great people is headed by His Majesty King George and his list of quotations is worthy of being reproduced for its own sake, as well as for the eminence of the one who uses it. These sentiments that hang in his workroom at Buckingham Palace read:

Teach me to be obedient to the rules of the game.  
Teach me to distinguish between sentiment and sentimentality, admiring the cat and despising the dog.  
Teach me neither to prefer nor to receive cheap praise.  
If I am called upon to suffer, let me be like a well-bred beast that goes on its knees in silence before the whip.  
Teach me to win if I may; if I may not, teach me to be a good loser.  
Teach me neither to cry for the moon nor to cry over spilled milk.

There is a philosophy of life in these various maxims. Their reading enables one to understand better the wisdom and restraint and good sense and understanding in the use of King George during his reign. Humble folk fighting life's daily battles may find some inspiration in these maxims. If I can, they are given to that end. —Regina Leader-Post.

## Round Up Criminals

International Organization Formed To Conduct Drive On Crooks

Police of several nations organized recently in Chicago the "International world police" to chase the criminal from his haunts over the globe.

The new international organization was formed at a meeting of Canadian, American and European police officials attending conferences sponsored by Barron Collier, special deputy police commissioner of New York, the international police conference, and the international association of chiefs of police. Winnipeg was represented by Chief Chris H. Newton.

## Prefer Native Workers

Many thousands foreign residents in Chile are asked by a new legislation that 85 per cent. of all factory jobs be given to natives of Chilean nationality. Many will have to leave the country to seek work elsewhere. If the foreigner has been in the country 10 years, or is married to a Chilean, he will be exempt if he is performing duties for which a native is unsuitable.

## Club Will Be Exclusive

Aviators who have crossed the north Atlantic alone are going to form a club. Plans for the organization were discussed by Amelia Earhart, Putnam and her house guest, Captain James A. Mooney. They broached the idea to Wiley Post, world solo flyer, who expressed approval. Col. Charles A. Lindbergh and Jimmy Doolittle, the other eligibles, also will be invited to join.

London letters recently gave to charity 2,000 old hats left by customers.

## Best Quality Shaving Brush FREE for POKER HANDS

## It pays to "Roll Your Own" with TURRET FINE CUT CIGARETTE TOBACCO SAVE THE POKER HANDS

### Recipes For This Week

(By Betty Barclay)

#### STUFFED TOMATO SURPRISE

(Serves 6)

- 6 medium size tomatoes.
- 1 tablespoon gelatine.
- 2 tablespoons cold water.
- 1 cup lemon juice.
- 1 cup boiling water.
- 1 cup orange juice.
- 1 cup dried celery.
- Mayonnaise.

Mint sprigs (or stuffed olives or pimiento).

Lettuce.

Peel tomatoes and remove centres. Invert and chill. Soak gelatine in cold water 5 minutes. Add boiling water. Stir well. Add lemon and orange juice. Pour into a pan of the right size to make a gelatine layer  $\frac{1}{2}$  to  $\frac{3}{4}$  inch thick. Chill until jelly is solid. Put in cubes. Half fill tomato shells with shrimp and celery blended with mayonnaise. Then pile shells as full as possible with lemon jelly cubes. Garnish with mayonnaise which may be colored green with spinach juice or vegetable coloring if desired. Decorate with mint sprigs, stuffed olive slices or pimiento. Serve very cold in lettuce cups.

#### BRAN DELIGHTS

- 1 1/2 cups sifted flour.
- 1 1/2 teaspoons combination baking powder.
- 1 1/2 teaspoon salt.
- 1 1/2 tablespoons grated orange rind.
- 1 cup butter or other shortening.
- 1 cup sugar.
- 1 egg, well beaten.
- 1 tablespoon milk.
- 1 tablespoon orange juice.
- 1 1/2 cups bran flakes with other parts of wheat.

Sift flour once, measure, add baking powder and salt, and sift again. Add orange rind to butter and cream thoroughly. Add sugar gradually and cream together until light and fluffy. Add egg, milk, and orange juice, beating well. Add flour; then add flakes and mix thoroughly. Chill until firm enough to roll. Roll  $\frac{1}{4}$  inch thick on slightly floured board. Cut in desired shapes and bake on ungreased half sheet in hot oven (425 degrees Fahrenheit) 5 to 10 minutes. Makes 4 dozen cookies.

#### Hourly Nursing Service

New Enterprise In Nursing Is Established At Edmonton

To meet prevalent conditions, and following along lines of nursing organizations in other cities the Edmonton Graduate Nurses' Association has organized an hourly nursing service in connection with the graduate nurses' registry.

Hourly nursing means that patients may secure skilled nursing care in the home for stated periods as they find necessary to comply with medical care. This form of nursing is similar to visiting nursing, except that hourly nursing is paid for on a time basis rather than on a visit basis.

The Graduate Nurses' Association is anxious to establish hourly nursing and is fortunate in establishing it under the graduate nurses' registry.

#### Vimy Ridge Memorial

Undertaking Which Is Not Yet Completed, Is Massive In Conception

The memorial on Vimy Ridge, which four Canadian divisions and the Thirtieth British Brigade of the West Kents and Scots stormed in April, 1917, is not yet completed 22 years after the Armistice. It is an undertaking massive in conception, on 240 acres 200 feet above the Douai Plain, and designed to be worthy of a victory of which Sir Douglas Haig said: "The capture of the renowned Vimy Ridge is an achievement of the highest order and of which Canada may well be proud. It was fitting that the sculptor should be a Canadian, Walter S. Allward. Sir Allward was an award that was open to the British Empire. Since 1925 he has been engaged on the work in a London studio. "All the time," he says, "I have sought to avoid any semblance of drum-beating. Canada mourns her dead in the way I have endeavored to show in the Mother Spirit, which stands with drooped head on the wall, brooding over the plain on which her sons fell. But not but victory is there. Blocks of from twelve to twenty tons were required, and they were found in an old Roman quarry in Yugoslavia, from which the stone to build the Palace of Diocletian in Spalato in the third century was taken.

The common cause of France and Canada is to be represented by two pylons 135 feet high. Below them will be seen the Spirit of Sacrifice in heroic figures grouped at the ends of a wall 237 feet long, the base of the memorial. Surrounding the pylons will appear in relief the names of the Canadian divisions. The design calls for the covering of the motifs of guns along the base by olive branches, from which the stone to build the Palace of Diocletian in Spalato in the third century was taken.

In F. McKenzie's "Canada's Day of Glory" may be read the breathless story of the capture of Vimy Ridge. A Canadian correspondent, he does justice to the part the men of Kent and Scotland played in that immortal feat of arms. The dedication will not be adequate without the presence of the commander of the troops engaged, Sir Julian Byng, Governor-General of Canada from 1921 to 1926. —New York Times.

#### Canadian Legion At Tokio

Structure Nearly Completed and Will Be Soon Ready For Occupancy

It is understood that work on the Canadian Legion in Tokio is proceeding rapidly and that the structure will shortly be ready for the occupancy of Hon. Herbert Murray, Canadian minister to Japan. While no official statement has been given by the government, it is learned that the structure is the last visit to Ottawa, urged upon the government the advisability of going ahead with the legion construction so the advantage might be taken of the low costs of labor and materials. The only opposition to the scheme was the scarcity of money. Emphasizing on such a project which could not be described as absolutely essential. Long term financing was arranged, however, and the work is now in progress some time. It is expected a statement will be issued by the government shortly.

Coffee exports from Haiti this year have exceeded all expectations.

#### A Genius For Organizing

Lord Of Thousand Ships Was Millionaire At Thirty-Nine

One of the reasons why the "sun never sets on the British flag" was the organizing genius of Sir John Ellerman, son of a German bookkeeper. Sir John died recently in France but in a hundred ports from Southampton to Sydney, his flag is flying on the ships which kept Britain first on the seas.

It was quite appropriate that Ellerman, the ship owner, should be the wealthiest man in Britain, whose life and property depend upon sea-borne commerce. A few years back when many values had not risen so far as they have today, Sir John's wealth was estimated at from \$100,000 to \$200,000. That put him far ahead of any other Britisher and in the class of John D. Rockefeller class. Even today the thrifty Briton is calculating that the nation will collect \$67,000,000 in death duties.

The Ellerman career, like that of Sir Thomas Lipton, proved that the art of being a self-made man bears no American patent. Ellerman rose from the humble place of black-coated English clerk in a shipping office by 30 he was a millionaire. By 50 he owned one-eighth of all the British shipping.

He was frugal in a nation where countless few squander the tradition of the wealthy. He never owned a yacht or a racing stable. It was said in the city that he never spent more than 5 per cent. of a year's income. The rest went into ships and more ships, land—he owned a large tract of land in London—bought at one time his newspaper holdings rivalled those of Northcliffe. But Ellerman never shared Arthur Hays Sulzberger's passion for political influence. He was content to collect the dividends and let the other men sweat the cashbin.

#### Move Settlers North

Settlers In Drouth Stricken Areas Of Southern Alberta To Go North

The Alberta government and the railways have agreed to share the costs of moving about 150 settlers from drought-stricken areas in southern Alberta, and only decision of the Dominion government as to its share in the project is pending, according to Hon. George Hoadley, Alberta minister of agriculture.

The settlers will be moved to more favorable areas in northern Alberta.

#### Barley As A Food

Mentioned in Exodus 9:3 and in other books of the Bible, barley was one of the most important foods of the human race for thousands of years. It is the staple food of the people called in Scotland, forms a favorite dish of porridge at the present day.

In the opinion of a dentist, soldiers make the best patients. They are thoroughly accustomed to drilling.

Has a hundred uses. Always has a box in the home. WAXED PAPER. Appleford, PAPER EQUIPERS. HUNTON, ONTARIO.

# United States And European Radio Programs To Be Heard Over Canadian Stations

Canadian radio listeners will hear over Canadian stations a wide variety of United States and European radio programs as a result of arrangements completed between the Canadian radio broadcasting commission and the big broadcasting companies of United States—National Broadcasting Company and the Columbia broadcasting system.

These arrangements were concluded in New York by Thomas Maher, vice-chairman of the commission. In return for the American programs, which are to be supplied to the commission for its national network, the commission is to supply the American companies with some of its popular programmes for broadcasting throughout United States. American part of the arrangement was made Friday by the commission.

Programmes to be supplied to the commission from the New York radio include grand opera from the Metropolitan Grand Opera House, New York, and the concert of the New York Philharmonic orchestra. The American broadcasting companies are also to supply programmes of their own creation in which famous singers and orchestras will be employed.

In addition to supplying the commission with American programmes, the United States broadcasting companies are to make available to the commission the broadcasts of important events and other features which they bring across the Atlantic from Great Britain and the continent.

As the programmes are to be carried on the commission network to stations in all parts of Canada, reception difficulties in connection with them will be overcome.

The exchange of programmes is a co-operative step and is without cost to the commission.

The United States end of the exchange will commence about October 1.

## Over Twelve Million Chinese Living Abroad

Population In Canada Is Given As Forty-Five Thousand

Chinese agitators against the so-called foreign imperialism never tell their listeners the magnitude of China's communities in other countries. However, the Chinese overseas affairs commission announce that 12,786,172 of their people reside in the United States and elsewhere beyond China.

Out of 22 nations or groups of nations listed, the United States ranks fourteenth in number of Chinese residents, the total being 74,954. Burma ranks sixth with 5,450,000 Chinese, while Canada with 500,000 is second and Malaysia is third with 2,000,000. In Dutch East Indies there are 1,250,000, in Korea 825,645, in Indo-China 480,000, in Formosa 340,000, in Soviet Russia 300,000.

Japan, which is rapidly becoming the graveyard of Chinese settlers, is listed as having 120,000 and ranks tenth in the list. However, hundreds of Chinese have just arrived back in China and more are to follow.

Macao, Cuba and the West Indies and the Philippines rank just ahead of the United States in Chinese residents. Following thereafter in decreasing proportions come Australia and the South Sea Islands, Canada with 45,000, Peru and Latin America, Honolulu, Japan with 25,063, South Africa, Panama and Central America with 20,000 and Europe with but 15,000 Chinese.

**Speedy Results**  
A young man who had suddenly inherited a fortune decided to learn how to carry himself in society. He went to a school of deportment, and a bowing Frenchman begged him to enter.

"Do you give lessons in deportment?" inquired the young man.  
"The best, m'love," gushed the proprietor. "My system is perfect. Two weeks ago a young man—like you, m'love—he take only three of my lessons in deportment—and yesterday he was reported."

Bobby (looking up from his book): "Is oxygen what oxen breathe all day?"  
Father: "Of course, and what every other animal and person breathes."  
Bobby: "And is nitrogen what everyone breathes at night?"

About 2,500 factory operations are necessary to produce accurate reproductions of the original.

W. N. U. 2006

## Our Canadian Population

Last Census Showed Comparatively Few Abnais In Dominion

Completions from the census of 1931, which are now being made available to the public refute the supposition that Canada is being "over-run" by foreigners.

Of the 10,378,786 people enumerated in Canada in that year, 9,254,081 were born in the Empire, and 8,009,261 of these were born in Canada itself.

It will be said, of course, that many of these were born of foreign parents. But the number is probably less than might be thought.

Of the 10,378,786 residents, only 1,058,095 were the offspring of two foreign parents, and only 570,522 were the offspring of foreign parents and themselves foreign born.

It does not follow that these are aliens. Many have been naturalized. The census, in fact, shows only 129,139 aliens in Canada, including 129,139 aliens in Canada, including Canadian and British subjects who have lost their Canadian nationality (by marriage to an alien husband, for example), and including also many migrants of British stock who have come to Canada from the States.

These alien 438,449 were born in twenty years ago. Many of them have been naturalized since the census was taken.

While the census men found 529,139 aliens in Canada, there are probably close to that number of Canadians who live abroad and are not included in the census at all. Of 1,278,421 persons of Canadian birth residing in the United States in 1930, 366,007 were classified as having retained their Canadian citizenship.

No doubt a proportion of these have, since that time, returned to the Dominion.—Toronto Daily Star.

## The Real Pulling Power

No Better Means To Reach Public Than Through Newspaper

One of the things the depression years seem to have taught American business men is that the newspaper advertisement is surest and most effective means of reaching the consuming public.

Figures just made public by the Bureau of Advertising of the American Newspaper Publishers' Association show that newspapers received 58 per cent. of the total advertising appropriations of 432 national advertisers in 1932 and constituted the preferred advertising medium of 19 of the principal trade groups in the United States.

Newspapers for example got 82 per cent. of the automobile advertisements, 74 per cent. of the gasoline ads, 92 per cent. of the railroad ads and 87 per cent. of the shoe and clothing advertisements.

The figures are a remarkable tribute to the "pulling power" of the newspaper advertisement.

Two thousand unemployed men will gather potatoes in the Island of Jersey, England, this year.

A squeak detector for automobiles has been installed in one service station in Washington, D.C.

## THE SCULLING CHAMPION AND THE COVETED TROPHY

It's really made! Style No. 742 is designed in sizes 10, 12, 14 and 16 years. Size 12 requires 1 1/2 yards 39-inch with 2 1/2 yards 39-inch for blouse and cape lining. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## Something New In Oil Wells

Has Been Producing Pure Vaseline For Ten Years

A tract of well which came in ten years ago as a producer of almost pure vaseline is still pumping the heavy golden substance and paying its owner at Laramie, Oklahoma, handsome returns.

Perhaps the only well of its kind in the world, this well is a marvel to veteran oil men, both as to the oil it produces and its life. Men who have followed the oil industry in many climes said they never have seen or heard of a similar well.

The well was drilled in at 3,710 feet on Jan. 26, 1923, for production estimated at 300 barrels a day. The "vaseline well" still produces around this amount and still is the only well in the area.

Other drilling attempts have produced dry holes. The strange kind of oil flowed over the derrick 200 feet when the well was drilled in. Dark green in color, the oil turned a brilliant golden yellow when it struck the outside air.

Analysis showed it to be almost pure vaseline. It was so heavy that it hung from fences near the well like gum.

Because of its thickness ordinary pipe line is not carry it. A special line, with a steam pipe to heat the almost solid lubricant, was used.

## New Guide For Airship

Pilot Can Leave Cockpit Without Endangering Craft Or Self

After two years of experiments, the "airship" a compact box one foot square and weighing less than 30 pounds, has been perfected to take complete charge of an aeroplane after it hops off.

Encased in a metal box, the automatic pilot would guide the ship to any predetermined height, level off and start on a charted course without a human pilot touching the controls.

Cycloscopically controlled and hydraulically operated, the device includes an automatic turn control, and enables the pilot to descend without the human pilot's leaving the cockpit for any length of time during actual flight without endangering the flight.

One of the airships now in use in a passenger aeroplane of a well-known air line, the machines weigh 180 miles an hour on a transcontinental jaunt.

The device does not dispense with the services of the pilot or co-pilot. Pilots are required to take off and land the aeroplanes and to keep a close check on weather soundings.

After Twenty-Two Years  
Stolen in Edmonton, Alta., 22 years ago, Detective-Sergeant Roy Perry recently recovered a watch in a Vancouver second-hand store.

Only one before was the missing watch seen by police and that was on June 1, 1917, when it was recovered from an ex-convict. A short time later it disappeared and no trace of it was discovered until now.

The wings of a common house fly vibrate 330 times a second.

# Canadian Publisher Finds That Life Goes On In Russia Much The Same As In Canada

## Week In Civilization

Enough For Trapper

Makes No Apologies For Desire To Return To Northland

A week in civilization is enough for Francis Jonsson, one of the best known trappers in the far north, in Prince Albert recently on his annual jaunt into the land of automobiles and depression.

He left again for Big River where he planned to push off his big canoe and paddle his way to his trapping grounds in the Hatchet Lake country, 400 miles from Fife, Fife, Manitoba. He and his dog followed the waterways to Fife from their northern home, and the canoe to Big River, spent four days in Prince Albert, and then away again.

He was a visitor at Prince Albert last summer and promised to go back next year. Civilization has its attractions but the hairy trapper makes no apology for his desire to get back to the land of trees and water.

Listening to his stories of experiences and looking at the wonderful collection of specimens of his outfit, his fur catch and of the scenic wonder of the northland, makes that desire understandable.

He spoke lightly of carrying his canoe and equipment over mile trips across unscenting seven trips back and forth or a total of 14 miles walking. On the round trip, there are 60 of them, though only a few are that long.

A trader in the city stated that once Jonsson comes in with the largest catch from the north. In addition to the furs, he is known as a "clean" trapper; his stock is always in good shape on its arrival.

## Canadians Invent "Super-Eye"

Its Use Will Make Perfect Television Possible Is Claim

The invention of a "super-eye" which it is claimed will make perfect television possible, revolutionize the speedy transmission of messages and motion pictures, and multiply a thousandfold the power of telescopes, has been announced at Ottawa.

The inventor is Dr. Francois C. Heurteau, head of the astrophysical branch of the Dominion Observatory.

Dr. Heurteau has been working for 10 years on an apparatus which he hopes will facilitate aerial observation. It is stated that application of the apparatus to television has not been contemplated until his research disclosed the possibilities in that direction.

Use of the photo-electric cell is said to be the basis of the invention which has been patented in the United States after a series of tests.

Dr. Heurteau was the discoverer of the mysterious planet "v," which was at first thought to be the planet "X" discovered by the Lowell Observatory in Arizona.

## Retire Civil Servants

Order Passed To Retire Those Who Have Passed Age Of 65 Years

Pursuant to the governments efforts to reduce the annual cost of public service by an amount estimated in the budget speech last March to reach \$14,000,000, the government in council passed an order providing for the retirement of civil servants who have reached or may reach the age of 65 years.

This is only one of the methods being adopted by the government in its economy efforts and the number of employees concerned is estimated at about 1,500 throughout Canada. Those retired will receive their superannuation allowances as provided under statute, and if not contributors to any retirement fund, will be given bonus on amounting to one month's salary for each two years they have been in the service up to a maximum of six months' salary.

## New Coinage For Spain

Coins which bear the head of ex-king Alfonso are to be replaced in a few weeks by the new coinage of the Spanish Republic. The head of Don Alfonso will be replaced on the face of the piece by a female figure representing the republic. On the reverse will be the arms of Spain. The 25-cent coin will have a symbol of the Republic of Yborite with a peasant shaking hands with an industrial worker.

More ships are entering the harbor of Hong Kong, China, this year than last.

The London Daily Express carried a long interview with Robert Cromie, publisher of The Vancouver Sun, who has just returned from Russia where, he said, "life goes on just the same as it does in England or France or China. One goes on just that thought in your mind, you get a new conception of Russia," he added.

The newspaper quoted Mr. Cromie as saying: "I landed in Moscow on their Derby day. I saw 50,000 people at the horse races betting on the ponies just like they bet in England. They were having drinks and lunches, but of course, it was all on the Russian standard which is not Aesop by 20 lengths."

"But the spirit of the people was the same as in any crowd in England or Russia. The tram cars of Russia cities are jammed with people. They are going to the underground system in Moscow in 1932, saw a crowd of 50,000 well-mannered, enthusiastic people watching a football match in the stadium. That was an eye-opener to me."

"I hear some critics say that conditions were not too bad in Moscow, but that down in the Ukraine people are starving. Someone from the Ukraine told me that the people in Moscow were drinking and brawling, but I heard about Russia in both true and untrue. It is time the civilized world began to sort them out."

## Studying Crime Impulse

Committee In London Seeking Its Cause And Cure

A secret inquiry is being conducted by a committee in London to deal with the problem of the "uncontrollable impulse" which is known as the "crime impulse."

The committee which has held several meetings, is composed of magistrates, business men, psychologists, medical men, K.C.s and a well-known "criminal" barrister.

When the investigation is completed, a report will be made to the Home Office with suggestions on a question that for years has baffled judges and doctors.

Questions relating to the treatment and punishment of offenders are applicable to "uncontrollable impulse" from the basis of the inquiry which is being conducted by men who have had opportunities of observing how it affects people in different walks of life.

Two points under consideration, for instance, are:

How far, if at all, should a person be punished for an offence committed under an uncontrollable impulse? Can that impulse be checked in youth, or eradicated if allowed to persist?

The investigation which, it is believed, may prove of considerable importance in criminal jurisprudence, developed on the subject of hypnosis.

A woman in high social position had been charged with stealing from a London store, and the plea of "uncontrollable impulse" was raised in mitigation.

The activities of the committee, however, are not limited to considering the problem as it affects shoplifting. They realize that while the impulse takes form in one case, there is a great variety of forms—many of them leading to very serious offences.

Experience gained by the members in their different capacities has been placed before the inquiry, and some illuminating information relating to cases and treatment has been collected.

## Carrots Good For Cattle

Benefit Shown In Heavy And Glossy Coats

Experiments of some Chicago experts have shown that the addition of the carrot to the ration of cattle, horses and sheep, is one of the best internal hair tonics yet discovered.

The vegetable's beneficial effects was first noticed when cattle were fed on carrots. Their coats became heavy and glossy.

Experts experimented on lambs and declare the carrot diet causes noticeable improvement, but that it does not equal that of animals.

Sixteenth century apothecaries made all out of rawsterns as a relaxing remedy for rheumatism.

Londoners borrowed 10,000,000 novels from public libraries in the last year.

Now the three R's are rouge, rum and rascals.

## Occasional Wife

EDNA ROSS WESTER  
"KORRETT"  
"LUSTIG GALS"

## SYNOPSIS

Camilla Hoyt, young and beautiful student in an art school, unconsciously sketches the head of a fellow student during class and when she is supposed to be drawing a Grecian urn. The professor, looking at her sketch, embarrasses Camilla by having Peter Anson, the boy whose head she sketched, criticize her work before the class. Afterwards Camilla goes to the party outside to cry. A hand touches her shoulder. "It turns out to be Peter, who apologizes for his action and consoles her. Camilla secretly adores him. He makes a date to see her that evening but is astonished when she names an expensive night club. It is far beyond his means but he resolves to go through with it.

(Now Go With The Story)

## CHAPTER III.

"Good evening sir," said the butler. "Good evening," Peter replied. "Mr. Anson, calling for Miss Hoyt."

"Yes, sir. Come right in, sir." Peter stepped into the cavernous hall. He hoped that he wouldn't have to meet the family. His apprehensions were relieved at once by a familiar voice from above. "Bates is that Mr. Anson?"

"Yes, Miss Camilla." His austere voice implied his disapproval of her unconventional.

"Tell him I'll be right down."

"Yes, Miss Camilla." He turned solemnly to Peter as if he had come a long way with the message. "Miss Hoyt will be right down sir."

Peter grinned. "So I heard."

"Yes, sir," Bates inclined his torso slightly, straightened and marched away stiffly.

Camilla fluttered down the broad stairway like a brilliant flower. Diaphanous folds of soft bright yellow skirted from below a snug little bodice jacket of spring green, like the skirt of a daffodil flutters from its green calyx.

"You are lovely," the butler emphasized the blackness of her eyes and hair and Peter had to remind himself severely that she was Camilla Hoyt the unattainable.

"Scripture is one of them," suggested Camilla.

"It is several of them, and that's about all I can consider for awhile."

"With the other important things wait?"

"I hope they will," his voice was lower. "But they might have to wait a long time. Trouble of it is, life is so short. We need to do everything at once and if we don't, we soon discover it's too late to begin."

"What for instance?"

"Whatever a man's ambitions are. And sometimes we even outgrow them, waiting to realize them. A person can make a thing he wants to do for so long that he finally discovers he doesn't care about doing it any more. You hold an ambition ahead of you for a long time, then when you finally catch up to it, you discover that in the process of growing up to it, you have gone beyond it in experience. That is especially true of other ambitions. Ever thought of that?"

"No," Camilla replied. "I never did much thinking about anything until recently, and I've been so all mixed up that I haven't arrived anywhere yet."

He laughed indulgently. "Oh, well, why should a girl like you try to think? You don't have to. I should think you should with my philosophy. Guess I think too much alone. I try to snap out of it and be a better entertainer, more like the ones you are used to."

"But I like you to be serious and philosophical, different from the other's. Hadly." "If you know how weary I am of—oh, all this—waste of time and energy—being with people I don't like—"

"Then you would rather not have come tonight—"

"Oh, yes! That's just what I'm grateful to tell you. You are different, and that's why I like you," she finished gently, her soft eyes turning to him with appeal.

He smiled, with a delightful sense of triumph.

"Do you like the show?"

"Do you like the show?"

"She was anxious to reassure him."

"Very much, don't you?"

"Sure," he agreed, but was thinking how much it had cost him and wondering how he would recover the loss. The show wasn't worth it, but being with Camilla compensated for any loss.

At the last curtain, he asked, "Did you say you liked the Middle?"

"Wherever you wish to go."

"That's okay with me, too," he said easily, but he never had been there before.

The captain waiter did not recognize Peter, but he knew Camilla and ushered them to a choice table with obsequious bows. That required a generous tip, Peter reflected. They were just seated when Camilla and her escort rushed up to greet them. There was nothing for Peter to do but invite them to make a foursome.

Very Wayne, it appeared, welcomed the idea because it gave him an opportunity to dance with Camilla. Peter placed and do things with Terry any time she wished. But she was not too gracious to him, he also noted with satisfaction.

Peter marvelled at the way she danced. It was no mystery why any man would want her for a partner. He hadn't given much time to such pleasant recreation, and regretted his lack of practice. But Camilla was like a butterfly floating on the breeze and he was the wind that carried her hither and yon, only deliciously conscious that he held her in his arms and that nothing in the world mattered very much just then.

"Do you mind so very much if I kiss you?" he asked. "I would like to, but I'm afraid you might not dance so divinely or look so heavenly as you do. You are like a sculptor's most exquisite model come to life—his masterpiece."

He lowered his lips close to her ear. "I'm very sorry if you could, because you might not dance so divinely or look so heavenly as you do. You are like a sculptor's most exquisite model come to life—his masterpiece."

Peter decided that this was an excellent opportunity to enter the inner circle of the system, and discover what it would be like. It wasn't that he sought personal approval. He only desired success. But he knew that the two were inseparable. It was evident that he could command the former without the latter, however Camilla resembled the way Charlie Harris and Lillian Berger flirted with Peter and let him know that he would be welcomed to their set at any time. She wondered if Peter knew—and led him away.

She had not wanted to see the dazzling, extravagant revue, but it was thrilling to sit close beside Peter.

## can't sleep?

Act at once! Get rest for your eyes closed by using FRUIT SALT. You need it every morning.

TAKE FRUIT SALT

in the dimly-lighted theatre and look up to feel his eyes and lips close to hers when they exchanged murmured comments. The splendor of the stage, the awing velvet curtains, the gowns and jewels and suave luxury of the audience oppressed him. It might be so different.

But Camilla resolved that such thoughts should not mar this perfect evening. Perhaps never again would she have the exquisite joy of being close to Peter, alone with him, his eyes laughing her at every glance. She must tell him the truth. Of all the people in the world with whom she wanted to be fair—it was Peter, even if she never saw him again.

Her friends sought them in the lounge during the intermission. Camilla insisted that they join her party in their box, but Camilla was firm. This was her evening with Peter, and she was determined that no one should interfere. Peter wondered, uncomfortably, if she were reluctant to join her friends because she was ashamed of him. But whatever her reason might be, he was grateful to return with her after the intermission to their own seats, for which he had paid the extravagant sum of \$6.00. That was the price for sitting beside Camilla for three hours, but it was worth it, when he had it. In the two months since he had discovered Camilla Hoyt in Professor Drake's class, he never had dared hope to be so near to her.

He was anxious for her pleasure. "Do you like the show?"

"She was anxious to reassure him."

"Very much, don't you?"

"Sure," he agreed, but was thinking how much it had cost him and wondering how he would recover the loss. The show wasn't worth it, but being with Camilla compensated for any loss.

## Canadian Pure Food

Great Care Taken With Canned Goods To Assure Purity

The Pure Food Laws of Canada state that "Canned fruits and canned vegetables are sound products made by sterilizing clean, sound, properly matured, prepared, fresh fruit or vegetables by means of heat, and keeping the same in suitable, clean containers, closed hermetically or otherwise, and to conform to name of the particular fruits or vegetables used in their preparation." No adulterant, preservative, or artificial coloring matter may be used in commercial canned fruits or vegetables. Therefore, they contain only pure water, sugar and salt. Tomatoes may have no added water, and the juice must be the juice from the particular lot of tomatoes. There are on the market at present over thirty-five sizes of cans. Only eleven of these are standardized. All containers not of standard size must have the net weight and drained weight of solids plainly stated on the labels—Dominion Fruit Branch.

Recent Surveys Show Steady Increase In Last Few Years

Contrary to the belief held by many people that the Indians are dying out, recent surveys point out that the majority are not dying out, but the last few years have shown a slow and steady increase in the Indian population.

The latest report of the Department of Indian Affairs shows that the Indians living in Canada numbered about 108,012, or 3,000 more than when the census was taken eight years ago.

It has also been found in making a survey of the Indian schools that there are 15,500 children enrolled, while in 1916 there were about 13,000.

The Indian of today, however, differs greatly from those who roamed the plains and hunted through the forests in the past. In those days a pony, a little trading of furs for what he received a scanty supply of food, blankets and an occasional gun—and his wants were satisfied. Today he differs from his ancestors in many respects. He has automobiles, phonographs, radio, outdoor motors and all the other conveniences he sees the white man use.

Many are very well educated. While they may have started in a reserve school, the records show that many of them have received a college education, some of whom even become citizens. Looking at the pictures of such graduates as they appear from time to time one realizes that it may not be such a far cry from a feather bonnet to a silk hat—Regina (Evening) Leader-Post.

## Canadian Pure Food

Great Care Taken With Canned Goods To Assure Purity

The Pure Food Laws of Canada state that "Canned fruits and canned vegetables are sound products made by sterilizing clean, sound, properly matured, prepared, fresh fruit or vegetables by means of heat, and keeping the same in suitable, clean containers, closed hermetically or otherwise, and to conform to name of the particular fruits or vegetables used in their preparation." No adulterant, preservative, or artificial coloring matter may be used in commercial canned fruits or vegetables. Therefore, they contain only pure water, sugar and salt. Tomatoes may have no added water, and the juice must be the juice from the particular lot of tomatoes. There are on the market at present over thirty-five sizes of cans. Only eleven of these are standardized. All containers not of standard size must have the net weight and drained weight of solids plainly stated on the labels—Dominion Fruit Branch.

Recent Surveys Show Steady Increase In Last Few Years

Contrary to the belief held by many people that the Indians are dying out, recent surveys point out that the majority are not dying out, but the last few years have shown a slow and steady increase in the Indian population.

The latest report of the Department of Indian Affairs shows that the Indians living in Canada numbered about 108,012, or 3,000 more than when the census was taken eight years ago.

It has also been found in making a survey of the Indian schools that there are 15,500 children enrolled, while in 1916 there were about 13,000.

The Indian of today, however, differs greatly from those who roamed the plains and hunted through the forests in the past. In those days a pony, a little trading of furs for what he received a scanty supply of food, blankets and an occasional gun—and his wants were satisfied. Today he differs from his ancestors in many respects. He has automobiles, phonographs, radio, outdoor motors and all the other conveniences he sees the white man use.

Many are very well educated. While they may have started in a reserve school, the records show that many of them have received a college education, some of whom even become citizens. Looking at the pictures of such graduates as they appear from time to time one realizes that it may not be such a far cry from a feather bonnet to a silk hat—Regina (Evening) Leader-Post.

nally of Didsbury, spent Sunday at the home of Mr. and Mrs. H.N. Elliott.

Rev. Norman Plummer will conduct service in the Anglican Church, Carbon, on Sunday, Aug. 20th, at 11 a.m.

Paul Schoeppe was a Calgary visitor on Tuesday of this week.

Six month's suspended sentence was imposed on Fred Harsch, farmer of the Carbon district, who pleaded guilty to a charge of attempted suicide, by his Honor, Judge E.P. McNeill in District Court, Calgary, last Friday. Accused pleaded his family made unreasonable demands although he had gone through five bad crop years, and said he went through the motions of hanging himself in order to frighten his family.

Warm, dry weather has made harvesting operations rapid and cutting of wheat is now fairly general. In the Carbon district. A few combines are at work on the early fields of wheat and it is said that most of the combined grain is grading No. 1. If the present weather continues nearly every farmer will be cutting by the first of next week.

A pinch of salt added to strawberries when preserving will help to retain color.

An apple kept in the cello box will keep heavier cakes, such as fruit, apple or nut cakes, fresh and a fl.

## PROVINCIAL TENNIS CHAMPIONS

(Continued from front page)

This particular instance included all the players in the Junior Championship, except the semi-finalists.

Miss Agnes Wise of Carbon also competed in the Girls' Junior Championship and was beaten in the semi-final by Miss Barbara Haylock of Calgary. Miss Wise took the first set 6-2, but lost out on the next two sets, 6-4, 6-3.

## That Old Troublesome Word "IF"

ONCE upon a time most people were worried a lot by "IF." A few still are. You can tell them if you listen to them when they are shopping.

"If you're sure that rug won't fade...."

"If you're positive this is pure wool...."

"If you'll guarantee these eggs as fresh...."

"If you think this washing machine will work better than the other one...."

"If.... if.... if...."

The trouble with such people is—they don't read advertisements. People who do read them do not have to depend upon "ifs" in their buying. They know what they are getting, because they have the definite, printed, reiterated assurance of the advertiser.

Most people nowadays do read the advertisements. They shop intelligently and quickly. They know beforehand what they want, why they want it, and how much they will have to pay, and where to go.

INTELLIGENT BUYERS SUBSTITUTE "KNOW" FOR "IF" BY READING THE ADVERTISEMENTS
